

Certification

ISPM15 & H3-AS1604 Certified

ISPM15 Export Certification

Axis Packaging are fully compliant with the ISPM15 scheme and certified by AQIS. This means ALL our products meet worldwide import and export regulations.

What does ISPM15 stand for?

ISPM15 stands for - International Standards for Phytosanitary Measures Publication No.15 - Guidelines for Regulating Wood Packaging in International Trade (ISPM 15).

What is ISPM15?

ISPM15 is a wood packaging standard adopted by the International Plant Protection Convention (IPPC). Unprocessed raw wood is often used in transporting products such as crates, cases, pallets, cradles, and skids. This wood provides a pathway for the introduction and spread of pests and disease and therefore poses significant risk to local plant health.

ISPM15 is aimed at significantly lessening this risk associated with international trade. It requires that all wood packaging material undergoes either heat treatment or fumigation with methyl bromide. An internationally recognised certification mark is applied to treated wood to verify that treatment has occurred and to provide traceability to the country of origin.

What is the AWPCS and AQIS authorisation?

The Australian Wood Packaging Certification Scheme (AWPCS) is a scheme that ensures that Australian treatment providers, and wood packaging manufacturers, produce wood packaging material that meets the ISPM15 standard.

Under this scheme wood packaging manufacturers and treatment providers who meet the requirements of ISPM15, are authorised by Australian Quarantine and Inspection Service (AQIS) to apply the internationally recognised mark to wood packaging material produced for use in the export trade.

How does Axis Packaging's compliance with ISPM15 affect my package?

Axis Packaging's compliance with ISPM 15 means your product can be shipped worldwide as it meets international import and exports regulations.

Axis Packaging's policy is as follows:

- All our timber packaging products come with an ISPM15 Certificate & Certification Marks.
- The ISPM15 Certificate is printed onto your delivery docket.
- The Certification Marks are applied to each end of your timber product.
- There is no extra charge for this service.

Axis Packaging Strength in Protection

At Axis Packaging, our mission is to deliver **Strength in Protection** through quality, customised and timely packaging.

With over 15 years experience, **Axis Packaging** are the widely acclaimed innovators in the field of industrial packaging.

Whether you're choosing from our large range of products, or taking advantage of our customised design service - **Axis Packaging** are sure to have the right answer for your packaging requirements.

Our "4 Step Packaging Design", provides a full service from measurement and consolidation, through to design and manufacture. When we design your packaging product, we give specific attention to your contents size, shape, fragility, weight and destination.

Axis Packaging also offer an additional range of services that includes in-house or on-site packaging, sea container packing, heat sealed shrink wrapping, stencilling, labelling and fabrication.

And whether it's land, sea, rail or air - **Axis Packaging** can also provide customised packaging and crating solutions that suit your method of transport.

Our dedicated **Axis Packaging** team are committed to providing you with the highest quality of products and the highest standard of on-going service no matter how big or small your needs.
